Why bread is bad for ducks and the lake

- Malnutrition—Bread is like junk food for ducks, it won't harm them in the short term, but it doesn't provide the correct nutrition for proper growth and development.
- Pollution—uneaten bread causes the water quality to deteriorate, which can cause harm to fish and other wildlife in the vicinity.
- Pest attraction—leftover food feeds other unwelcome pests such as rats.

Alternatives

Grapes cut in half
Defrosted frozen peas
Oats, birdseed or grains
Duck food pellets.
